ARKARSAS PINANCES. In a brief paragraph we yesterday called the attention of the holders of Arkansas bonds to an advertisement of the board of finance of that State, in which propositions of accommodation are tendered, which, if accepted, may rewere in receipt of a circular from the the Arkansas legislature providing means to pay the expenses of the State tressurer's certificates, together with a son et al , and is as follows: Frand, or want of consideration, is no defense for either the maker or accommodation independent of a promissory note, as against a for a copy of senate joint resolution number is empty, its credit bankrupted, its bonds under protest, and its revenues auticipated by the issue of treasurer's certificates and other items of floating debt which are receivable in payment "for all debts due the State except laterest on the public debt," Examinations of the books show that when Powel Clayton took possession of the State in 1968 as governor the bonded debt of the State amounted to \$3,252,-401 50; that its floating debt was nothing-on the contrary, there was \$319,-237 35 of United States currency in the treasury. Further examinations show that from 1868 to 1874, the period the State has been under carpetbag rule, there was collected from the people in taxes for State purposes the sum of \$6,-674.511 65, and that there was paid out during that period on account of interest and the sinking fund the sum of \$515,204 59. The deficiency as shown by the floating debt is about \$1,700,000 for the same period. We have, then, this row kind of an account of debit of these people to the State:

1. Amount each in treasury in 1868.5 319,237 35. 2. Amount collected in taxes 1868 to

years. Three hundred thousand dollars per year, or \$1,800,000 for the whole pe riod, would have been ample for a good government! In addition to the above sums, these people, on one pretext and with this appaling condition of finance that the present legislature of Arkansas bill above referred to to provide for the of the State government for one year. The holders of the floating debt cannot security to the bonds proposed to be issued, so as to make them of sufficient lands on which public buildings are sittion of the Federal constitution, that set apart out of the first moneys received into the treasury, on any account, in each year, and an authority is conferred upon the courts of the State, and of the United States, to compel the officers of the State to perform the conditions of prejudice the rights of holders of these bonds. These bonds are in fact made a preferred debt of the State, and their payment is unquestionably secured; in fact no State bonds are better secured. If any friend of the State can suggest a better plan to meet the case, says Mr. Loughborough, there is no doubt but that the legislature will gladly adopt it. The people of Arkaneas are earnestly desirous of getting on firm land, has been in every gap and gorge finaccial ground. The State has advantages of soil and production equal to any State in the Union, and it has, without exception, the best climate in the United States, and if the creditors of the He has a large scientific and practical State will only meet her people in the spirit of compromise suggested by the advertisement of the board of finance, with General Wilder as guide, the discial affairs in a condition satisfactory to

In the absence of any specified rate, the in-terest to be at the rate of seven per cent, per annum. Second—inflict a fine of ten per cent, of the amount involved on both lender and bor-rower in cases of violation of the law, the proceeds of the fine to go into the treasury of he State.
Third-Make the collection of debts sumry, and thus inspire capital with confi-ce. Our presen coll-ction laws are a posiarrivale

Cautionary Suggestions,

Mardi Gras and all such celebrations afford good fields of operations to thieves and pick-pockets. To guard against such depredations all di izens and visitors are requested to de-posit at their holes, or in some place of safe-keering, their watches and other valuables. Our citizens should see that their residences are left in charge of some responsible person who will protect the same in their absence. I would a so call the attention of business men and o here on the time of the process on to the security of their perches and awnings; to see that they are sufficiently strong before allowing persons to assemble thereon, this saying, perhaps, the live of our visitors and friends.
